

# THE SEEDSPIRACY FIELD MANUAL

**Clay Grenades, Edible Graffiti, and  
Going back to our Roots**

If you've gotten this far you are  
already breaking some rules...  
Go Outside! Look Around!  
what do you see?

Building Cameras, everything  
controlled, everything sterile.  
Frankly That's **Fucked up!** we  
should have the freedom to  
live in a world full of color and  
not in this one full of grays and  
depressing shades everywhere  
you turn to.

Welcome to **Guerrilla  
Gardening**. This isn't your  
plant by the window  
operation, this is Guerrilla  
Art, Punk Rock Rebellion and  
Edible Activism all rolled into  
one Little Clay Grenade

## HERE'S THE DEAL

### Midnight Missions

Sneak under cover of darkness (or daylight if you've got guts). No flashy lights or loud distractions **Just you**, the spot, and your clay grenades.

### Ghost Moves

Scope your target, practice your lob, then vanish. Security cams? **Blind-spot** choreography. Footprints? Erased.

### 90-Second Escape

Quickly enter, throw **10 to 15 bombs**, and make your exit before the timer reaches one minute and thirty seconds. **Remember**, speed is your ally.

### Leave No Trace

**Toss those gloves** into the bin like you're ditching evidence. **Your hands are clean** until those rogue plants start sprouting up

We're here because **Public space isn't public anymore**, its designed to be hostile, boring, lifeless. Guerrilla Gardening means giving the finger to those colorless scenery, empty lots, and corporate tyrants alike.

## **NO PERMITS NO PERMISSION JUST PLANTS!!!**

<b>Terrain</b>	<b>Risk</b>	<b>Soil</b>	<b>Action</b>
Tree-pit with no planters	Medium ⚠️⚠️	15 cm	Clay bombs
Abandoned lot behind chain-link fence	Low ⚠️	30+cm	Full-sized bombs
Center traffic median	High ⚠️⚠️⚠️	5cm	Micro-pulp wafers “drive-by flick”
Rooftop planters (rooftop gardens)	Low ⚠️	10cm	Paper ghost bombs (less weight, zero suspicion)

### CLAY CLASSIC

#### The OG Grenade

##### Ingredients & Ratio

- 5 parts red clay powder
- 3 parts sifted compost
- 1 part seeds of choice

1. Dry-mix clay + compost until uniform.
2. Gently fold in seeds—don't crush them.
3. Mist with water till it feels like stiff dough.
4. Roll into 1.5 cm marbles.
5. Air-dry 48 h (jawbreaker-hard = perfect).

### PULP PHANTOM

#### Paper-Ghost Bomb

##### Ingredients & Ratio

- 1 cup shredded non-glossy paper
- 1 tsp worm castings
- 1 part seeds

1. Soak shredded paper in warm water for 30 min.
2. Blend to a pulp; squeeze out excess liquid.
3. Stir in worm castings + seeds.
4. Press into coin shapes
5. Dry overnight

### SMOKE & MIRRORS

#### Charcoal Ninja Slug

##### Ingredients & Ratio

- 1 part BBQ charcoal (pulverized)
- 1 part sifted compost
- 1 part seeds

1. Grind charcoal to a fine powder.
2. Mix charcoal + compost + seeds until damp sand consistency.
3. Pack into 2–3 cm cylindrical slugs.
4. Wrap in tissue or toilet-paper “sheath.”
5. Dry 24 h; ready for silent insertion.

We're reclaiming our space, We advanced from black and white to colour with our tech why with our world we are going from colour to black and white? The cities spends millions sterilizing and “maintain” land nobody enjoys. We Spend Pennies turning all that work into vibrant places you want to see and be around. Don't you want this In your near Future?

Think of it as street art, but instead of spraypaint were using flowers, food, and whatever seed you find in your pocket. Anyone can do it And everyone Should!

If you're reading this,  
you are the resistance.

Share nothing but proof: photos of sprouts.  
Tag @Seedspiracy if you dare.
